Assignment 2

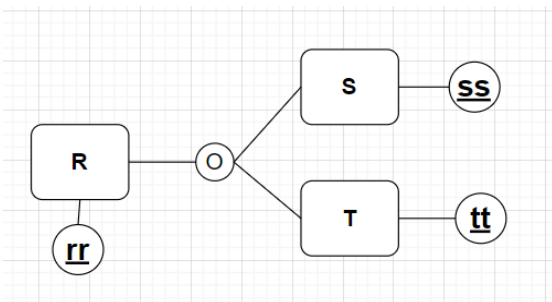
Question 1 (5 marks):

Indicate whether the following statements are True or False and correct the wrong statements:

1. *The relational model for the following diagram is: R(rr), S(ss,rr) , T(tt,rr).*

X

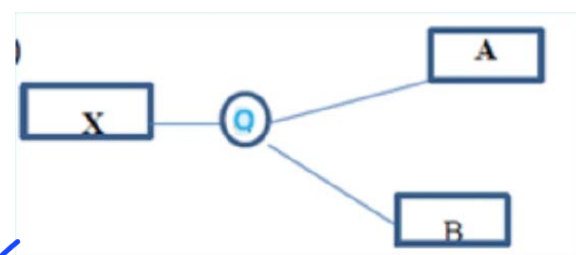
R(rr), S(ss,rr), T(tt,rr)



2. *For the following diagram: X is specified as either A or B only.*

X

may exist in more than one subclass Concurrently



✓

3. *EER in database modeling stands for Extended Entity-Relationship.*

specialization

X 4. *Generalization concept is called Top-down.*

generalization

X 5. *Normalization is One of the concepts of EER model.*

Question 2 (5 marks):

Choose one and only one most suitable answer.

1. *In a Hierarchical model records are organized as*
   A) Graph. *B) List*
   C) Links *D) Tree*

2. *Process of defining subclasses of superclass:*
   A) Specialization. *B) Category.*
   C) Union. *D) Generalization.*

3. *A specialization is* ***total and disjoint****. What is TRUE?*
   A) An entity can belong to multiple subclasses.
   B) Every entity must belong to exactly one subclass.
   C) Some entities may not belong to any subclass.
   D) Subclasses must have the same attributes.

4. *If specialization is* ***total and disjoint****, which mapping is possible?*
   A) One Superclass table with its subclasses' local attributes only.
   B) One Superclass with one type attribute and subclasses' local attributes.
   C) No valid mapping.

5. ***Union type (category) in EER:***
   A) Entity that is a Shared class.
   B) Attribute derived from other attributes.
   C) Special entity that is a subset of the union of distinct entity types.
   D) Generalization of multiple entities into a single entity.

GOOD LUCK.
